

NATCOM –III

Assessment of Economic Cost of Impact of Heat-Stress on Labour Productivity and Adaptation in Selected Building and Transport Sectors

About: Ministry of Environment, Forest and Climate change, Government of India is currently engaged in preparation of India's Third National Communication (TNC) to UNFCCC. One of the major components of TNC providing information on climate change Impacts, Vulnerability and Adaptation. Being one of the pioneer multidisciplinary research organization research Global Change programme –Jadavpur University has been providing climate change research inputs to the NATCOM process of Government of India since beginning. After successfully completing NATCOM-I and NATCOM-II project. Similarly, for NATCOM-III project namely **Assessment of Economic Cost of Impact of Heat-Stress on Labour Productivity and Adaptation in Selected Building and Transport Sectors GCP-JU has been selected.** The primary objective of this project is to develop adaptation strategies and costs that falls within the scope of cross sector adaptation: building and transport sector vis-à-vis costs of heat stress through labour productivity loss
